Plant Adaptations

Yellow flag
(*Iris pseudacorus*)

With your child, explore some different habitats in the Gardens.

Can you find a habitat that is:

- Grassy
- Rocky
- Sandy

Choose a habitat to look at closely. Can you find a plant that is:

- Big and bushy
- Growing low
- Twisting and twirling

Why not act them out with your child?

Close your eyes. Ask your child:

What can you hear?
What can you smell?

Act out some of the insects and animals you hear or see living in the habitat.

- Sing like a bird
- Buzz like a bee
- Curl up small like a worm

Find a habitat where lots of flowers are growing.

How many different colours and shapes can you find?

With your child, look out for bees visiting the flowers.

Which flowers are they visiting the most?

Did you know?

Wildflower meadows are diverse habitats with a huge variety of flowers – perfect for pollinators! Many native wildflowers have adapted shapes, sizes and colours that are very attractive to bees.
